 Ignition module, 2000-03**

Because our speed-limited ignition systems have a variety of maximum engine speeds we will be colour-coding the protective sleeve that shrouds the HT cable. This will allow identification of the various ignition modules. The ignition modules are outwardly identical but have different maximum engine speeds for different products. As with earlier ignition modules, which were not colour-coded, the part number is also stamped on each module.

The part number will not change as a result of colour-coding.

<b>Ignition modules</b>	<b>Colour</b>	<b>Max. engine speed. Rpm</b>	<b>To be fitted to model</b>
