

SB, 235 R, Bevel gear for 1" cutting attachment, 2003-01

We will be switching from using a 20-mm centre hole on cutting attachments to a 1" hole (= 25.4 mm). This means that the centre guide for cutting attachments on the support flange will increase from 20 mm to 1". As a result there are now new part numbers for the gear assembly, support flange and backing ring, as well as the locking ring that sits on the gear housing above the backing ring.

Other gear parts are unaffected and therefore keep their earlier part numbers.

The new parts can be fitted to earlier gear units intended for 20-mm cutting attachments. Note that all parts, including the support flange, backing ring and locking ring must in this case be replaced.

New part no.	Description	Excl. part no.	Remark
503 75 83-02 (1")	Gear assy.	503 75 83-01 (20 mm)	
537 19 64-01 (1")	Support flange	502 03 10-03 (20 mm)	
537 19 61-01 (1")	Backing ring	502 19 46-01 (20 mm)	
503 27 07-35 (1")	Locking ring	735 31 33-10 (20 mm)	

Introduced from serial number: 024900001
