## SB, Top handle, Spare part tank, 2003-08

The spare part tank for top handle saws has been modified to suit both saws with and without air purge. The tank can be used directly when fitting on older machines without air purge. To fit on saws with air purge the cover must be dismantled and the bolt removed from the valve sleeve, see the figure. The nipple for the air purge return hoses is then fitted in this hole.

New part no.	Description	Excl. part no.	Remark
537 05 28-01	Valve sleeve		
537 33 75-01	Compl. Set, purge seals		*

\* Contains valve sleeve, bolt and plug
