STARTER DEVICE

In order to obtain a better bearing surface for the pulley, a new starter assembly is introduced. The center post diameter is increased from 10 to 14 mm, which also means that a new pulley and recoil spring must be used.

<u>New parts</u>	<u>Description</u>	<u>Previous parts</u>
501 77 67-01	Starter compl.	501 52 00-02 is excluded
501 77 68-01	Starter housing	501 52 01-02 is excluded
503 10 24-02	Pulley	501 52 07-01 remains as a spare part
501 52 04-02	Recoil spring	501 52 04-01 remains as a spare part
734 18 13-51	Washer	503 23 43-01 remains as a spare part
729 24 48-05	Screw	503 20 40-06 remains as a spare part

Pulley 503 10 24-02 has a pulley sleeve, which is wider than the previous version and has also two grooves for easier identification.

The new versions of pulley, recoil spring, washer and screw cannot be used in the starter of the old type.

Starter compl. 501 77 67-01 can of course be used on old saws.

PLEASE NOTE! If you order starter housing 501 52 01-02, your order will be changed to the new starter compl. 501 77 67-01.

On model 61, this change is introduced from serial number 5230571

On model 266, this change will be introduced at the first suitable opportunity.
