

MODEL 281 XP

NEW AV-SYSTEM

A new AV-system is introduced, in order to improve the vibration level. The two front AV-elements of rubber are replaced by one AV-element in spring design and two movement limiters. A rubber support is also added on the front handle.

<u>New Ref. No.</u>	<u>Denomination</u>	<u>Excluded Ref. No.</u>	<u>Remark</u>
501 91 81-01	Spike	501 80 84-01 501 81 93-01	
501 91 90-01	AV-element		
501 91 70-01	Support		Rebuilding kit
503 22 65-01	Nut		503 45 41-01
501 91 89-01	Rubber support		
725 53 30-55	Screw		
503 21 14-09	Screw	503 21 14-01	
501 91 83-01	Spring insert		
501 91 84-01	Spike, outside	501 80 85-01 501 81 94-01	

To be able to modify the model 181, we have a separate rebuilding kit available, which contains the above mentioned parts. Reference number 503 45 41-01.

Note that an attachment hole for the support \varnothing 4.7 mm must be drilled in the tank, when mounting the screw in the rear attachment hole in the support. Furthermore the groove in the tank, for the front handle, must be increased by 3 mm (.120") towards the front.
