

MODELS: 33, 38

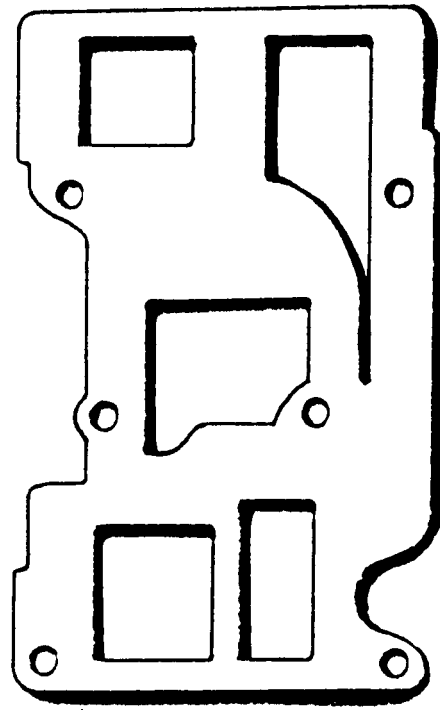

GASKET FOR THE TANK

The gasket between the front and rear tank halves have been changed concerning material and thickness. The gasket keeps the old Ref. No. 507 43 33-73, despite the change. The change of material means a higher mechanical strength and increased shape stability. The thickness is changed to 2,5 mm/0,093" compared to previous 1,7 mm/0,062".

The change is introduced from serial number 913652498.
