

**MODELS 42, 242, 61, 266, 268, 272**

## FUEL HOSE

A spiral shaped fuel hose is introduced in our production in order to simplify filter change and to reduce the risk for the filter to get stuck in the tank.

The fuel tank is adjusted to the new hose at the same time. Therefore the hole in the tank is moved (only the models 42/242) and also increased in diameter.

The length of the hose over the fuel tank should be 60-70 mm (extended hose).

### Note!

Saws with older tanks can use the new fuel hose if the following rework is done. (See the illustration).

- \* Drill a 9,5 mm (3/8") hole in the tank.
- \* Mount the rubber sealing ref. no 501 27 13-01 (266/268, 61/66, 281/288) in the new hole.
- \* Then pull the spiral fuel hose through the hole until a length of (extended hose) 60-70 mm over the tank is received.

	New ref. no	Description	Excluded ref. no	Remark
42/242	503 57 76-01	Fuel hose	501 79 52-01	*
61,266,268,272	503 57 76-01	Fuel hose	501 51 82-01	*

\* Remains as spare parts

Introduced in our production from serial number:		
42		1180240
242	XP	1170211
242	XPG	1180259
61		1470310
266		1470230
268		1470406
272		1470001
