

## Models 42/242

### Crankshaft bearings

In order to even more increase the durability at high rpm, we have increased the diameter on the crank pin from 12,0 mm to 13,0 mm. The bearing is increased from 12x16x10 mm to 13x17x10 mm.

In order to make it easier to separate the two crankshafts, the new crankshaft compl. has received new ref. no.

New Ref. No.	Description	Excl. Ref. No.	Remark
503 53 67-03	Crankshaft compl.	503 53 67-01	*
503 53 67-04	Crankshaft compl.	503 53 67-02	**

Introduced from serial number:		
42		4110291
242 XP		4130001
242 XPG		4110001

\*\* There is full interchangeability between the old and new design.

\* Crankshaft 503 53 67-03 should be used for saws with serial number lower than:

H 42	0450748
H 242 SE	0130392
H 242 SG	0130001

Remains as a spare part
