Flywheel

A new flywheel with larger capacity is introduced in order to improve the cooling of the engine. The fan blades are 2 mm higher, among other things.

In order to get room for the higher flywheel, another air conductor for this purpose has also been introduced. Both parts can be used on older saws.

NOTE! If a flywheel of later version is mounted a new air conductor must be mounted also.

New Ref. No.	Description	Excl. Ref. No.	Remark
503 52 94-01	Flywheel	503 12 82-01	*
503 52 94-02	Flywheel G	503 12 82-02	*
503 54 40-03	Air conductor	503 54 40-02	**
