

## Modell 394

### Filter cover springs

The springs that hold the filter cover have been modified as follows:

- Widened from 7 mm to 10 mm.
- New stronger material.

The reinforced springs give a longer service life and less wear between the filter cover and air filter. The springs can only be fitted to covers of a later design.

New Ref. No.	Description	Excl. Ref. No	Remark
503 52 64-06	Cylinder cover complete	503 52 64-02	
503 52 65-02	Filter cover standard	503 52 65-01	
503 73 38-02	Filter cover HD	503 73 38-01	
503 54 35-02	Springs	503 54 35-01	R
503 74 68-02	HD-filter kit	503 74 68-01	

R = Remains as a spare part.
