

## Model 240, 245

### Bevel gear

A number of modifications to the bevel gear, among others an increased gear module and larger bearings, have been introduced to improve its strength.

All incorporated parts are also available as spare parts.

On older machines the complete gearing must be replaced.

New Ref. No.	Description	Excl. Ref. No.	Remark
502 28 57-02	Gear cmpl	502 26 90-03
