SB, 365, Carburettor, 1998-06

To lock the choke shaft in closed position, a spring-loaded ball is mounted in the carburettor housing. This implies a new carburettor housing and a number of new parts. The carburettor is also given a new description.

Parts with description EPA only apply to carburettor C3M-EL8A. Previous carburettors can not be rebuilt to the later type of choke valve.
