## SB, Hedge trimmers, 1998-09

### Lubricant for cutting blades, UL 21

There is now a special lubricant, which must be applied to the cutting blades to prevent stiff operation. The lubricant also dissolves plant juices and resin. The blades should be lubricated regularly after use.

Before long-term storage the blades should be lubricated and the machine should then be run on full throttle for 10-15 seconds.

The spray can holds 200 ml.

The propellant is butane.
