## SB, 335XPT, Carburettor, 1999-02

In order to ensure correct operation of the choke the choke shaft has been modified so that the valve is locked in the closed position by a ball and spring. The choke rod has also been modified for the new shaft, and in order to facilitate identification it is now white instead of black.

NOTE! The original Walbro 459 B carburettor assembly can be replaced with the NEW Walbro WT 532 carburettor without any further modification, but the NEW choke rod must also be fitted.

Old Walbro 459 B carburettors can be converted to the new specification as detailed below. Walbro 459 B carburettors that have already been converted to the new specification may be found on production saws from serial number 850 0001 onwards. These can easily be identified by checking whether the spring-loaded ball is countersunk. See diagram A!

<b>New ref. no.</b>	<b>Description</b>	<b>Excl. ref. no.</b>	<b>Remarks</b>
503 28 15-18	Carburettor Walbro WT532	503 28 15-11
