

Service Note	N0102001
	2001-11

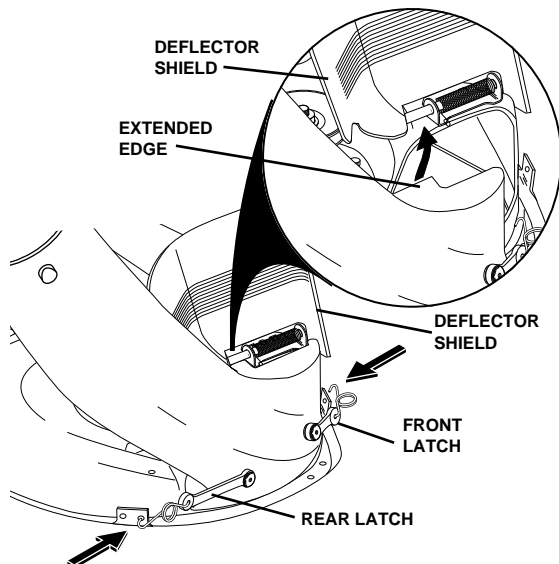

Models Involved: C42 Grass Catcher (42")

Subject: Installing Lower Chute to Mower Deck

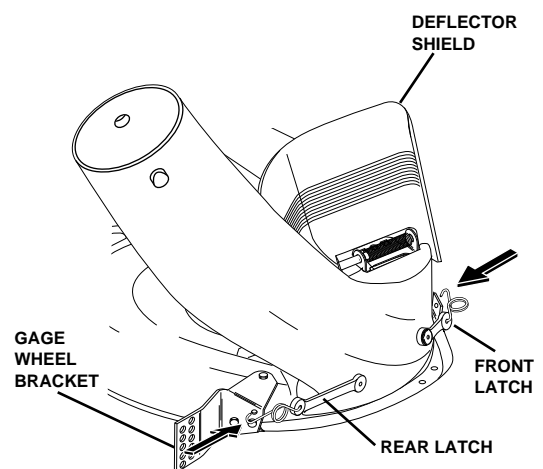

1. With deck in lowest cutting position, raise and hold deflector shield in upright position.
2. Place rear of chute over rear of mower deck opening. Push chute down and forward to guide extended edge of chute between discharge guard and mower deck.
3. Hook front latch into tab hole on front of mower deck.
4. Hook rear latch into tab hole on back of mower deck. If your tractor is equipped with gage wheels on the deck, then it will be necessary to use the hole in the gage wheel mounting bracket instead of the hole in the deck.

Note: Once the bagger chute is installed and used, it will set to the shape of the deck housing and become easier to install with each use.

Deck Without Gage Wheels

Deck With Gage Wheels

CAUTION: Do not remove discharge guard from mower. Raise and hold guard when attaching lower chute and allow it to rest on chute while in operation.
