Subject: Fan Intake Cover

In order to prevent the accumulation of leaves or other debris in the fan intake area, a fan intake cover (part # 695 00 08-12) has been designed to install between the fan housing and the backpack frame.

During assembly, please ensure that this cover is securely installed onto the fan housing. When positioned correctly, a "click" will be heard when the cover is pressed on.

See pages 2 & 3 for pictures of the installation.

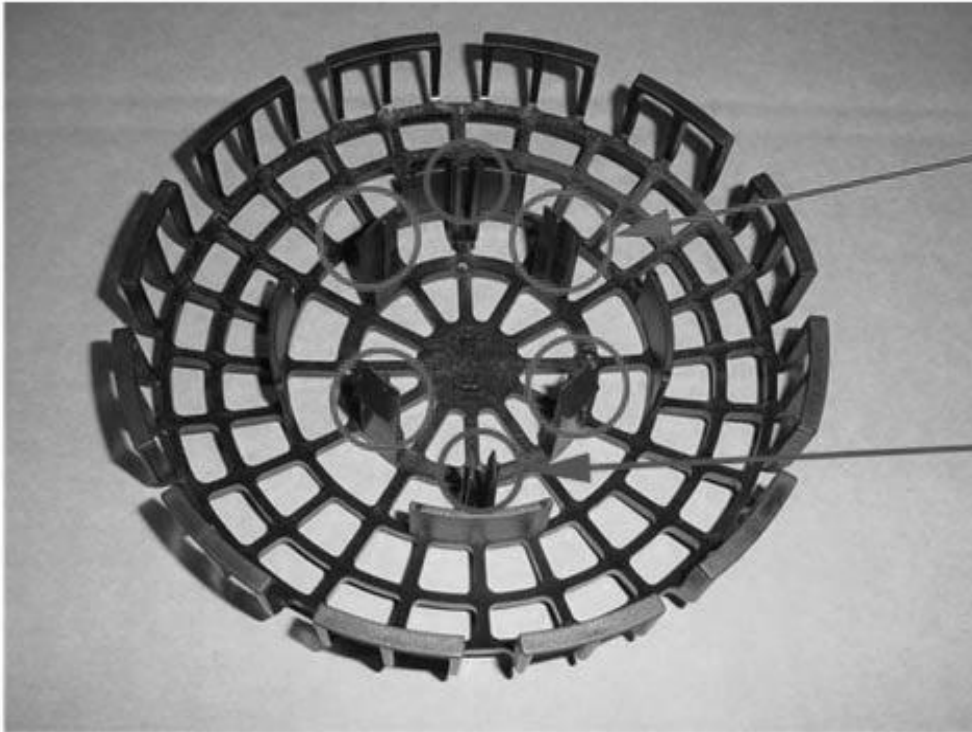

Fan Intake Cover
695 00 08-12

Installation of fan cover

Positioning fan cover

• Fan cover

Claw "A" (4 locations)

Claw "B" (2 locations)

• Fan case

Rib "A" (4 locations)

Rib "B" (2 locations)

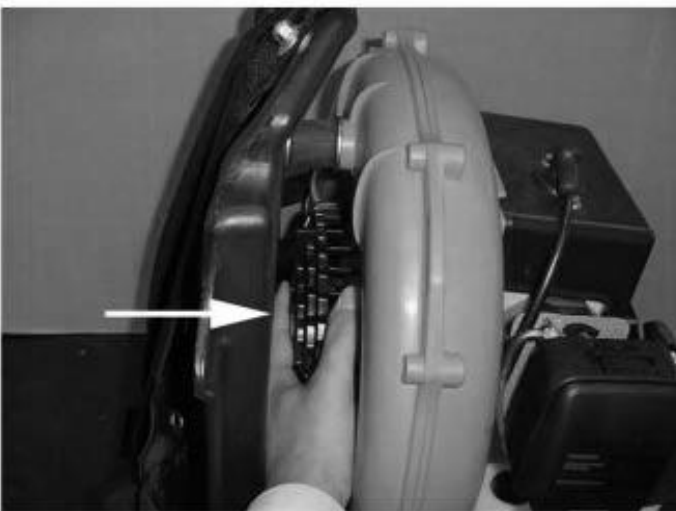

Position the rib to be pointing straight up

Picture 1

• **Insert from the side of the unit.**

• **Set the claw of the fan cover to the rib of the fan case.
(Refer to Page 2 for illustration)**

Picture 2

• **Push the fan cover against the fan case until a click is heard.**

Picture 3

• **After attaching, ensure that the fan cover is securely locked in place.**
