	Pressure Washer Tune-Up Check List	
	· · · · · · · · · · · · · · · · · · ·	
	Water inlet filter is clean and free of debris (dirt, grass, leaves, etc.).	
	Garden hose washer is seated properly and in good condition to prevent leaks.	
Q <sub>1</sub>	Detergent/chemical suction hose is in good shape (no kinks, cuts, etc.).	
Pump	Detergent/chemical filter is clean and set to open position (if adjustable).	
현	Pump oil is at proper level and in good condition.	
	No evidence of oil leaks.	
	High pressure hose, trigger gun, spray lance, and nozzles are in good condition.	
	Engine oil is at proper level and in good condition.	
Φ	Engine air filter and pre-filter are clean and in good condition.	
ßin	Fuel, fuel filter, and fuel hoses are in good condition.	
ក្ន	Spark plug is in good condition	
闰	Choke and choke cable operate properly.	
	No evidence of oil leaks.	
	Electric power cable and GFCI plug are in good condition.	
is	Electric power cable and GFCI plug are in good condition.  Guards and shrouds are in place.	
is	Guards and shrouds are in place.	
is	Guards and shrouds are in place.	
Mis	Guards and shrouds are in place.  Tires are properly inflated.  Sufficient supply of clean water is available	
Mis	Guards and shrouds are in place.  Tires are properly inflated.  Sufficient supply of clean water is available (measure time required to fill a 5 gallon bucket and divide by 5 for GPM).  Garden hose has been flushed prior to connection to pressure washer	
Mis	Guards and shrouds are in place.  Tires are properly inflated.  Sufficient supply of clean water is available (measure time required to fill a 5 gallon bucket and divide by 5 for GPM).  Garden hose has been flushed prior to connection to pressure washer to clear any debris or hot water (heated by sun).	
g Checks Mis	Guards and shrouds are in place.  Tires are properly inflated.  Sufficient supply of clean water is available (measure time required to fill a 5 gallon bucket and divide by 5 for GPM).  Garden hose has been flushed prior to connection to pressure washer to clear any debris or hot water (heated by sun).  Spray pattern is clean and steady.	
g Checks Mis	Guards and shrouds are in place.  Tires are properly inflated.  Sufficient supply of clean water is available (measure time required to fill a 5 gallon bucket and divide by 5 for GPM).  Garden hose has been flushed prior to connection to pressure washer to clear any debris or hot water (heated by sun).  Spray pattern is clean and steady.  Output pressure is good.	
g Checks Mis	Guards and shrouds are in place.  Tires are properly inflated.  Sufficient supply of clean water is available (measure time required to fill a 5 gallon bucket and divide by 5 for GPM).  Garden hose has been flushed prior to connection to pressure washer to clear any debris or hot water (heated by sun).  Spray pattern is clean and steady.  Output pressure is good.  Detergent/chemical injector is working.	
Checks	Guards and shrouds are in place.  Tires are properly inflated.  Sufficient supply of clean water is available (measure time required to fill a 5 gallon bucket and divide by 5 for GPM).  Garden hose has been flushed prior to connection to pressure washer to clear any debris or hot water (heated by sun).  Spray pattern is clean and steady.  Output pressure is good.  Detergent/chemical injector is working.  Unloader/bypass valve is working.	
unning Checks Mis	Guards and shrouds are in place.  Tires are properly inflated.  Sufficient supply of clean water is available (measure time required to fill a 5 gallon bucket and divide by 5 for GPM).  Garden hose has been flushed prior to connection to pressure washer to clear any debris or hot water (heated by sun).  Spray pattern is clean and steady.  Output pressure is good.  Detergent/chemical injector is working.  Unloader/bypass valve is working.  Safety relief valve is adjusted properly (factory set and sealed if equipped).
